

Petition RM-10641 asks for the collection and maintenance of personal data on a majority of people who have committed no offenses. This action is contrary to the idea of safeguarding our privacy and will most likely subject be subject to its own abuses. Owners/operators of databases will be undoubtedly be offered the opportunity to sell personal information for non-enforcement purposes.

Collection and maintenance efforts will add to the cost of the equipment purchased while not providing any additional benefit to the purchaser.

I foresee many additional costs and burdens placed on innocent citizens who will derive no tangible gain if the petition is implemented. I am requesting that the petition be denied.
